As you are all aware, the technology of the railroad industry has come a long way in the last several years. Most of you will have noticed obvious things such as improved internet capabilities. Many will have noticed that the industry has improved considerably in safety and preventative measures.

One of those objectives is to maintain tank cars before problems occur. The AAR has issued circular letter CPC-1145 requesting comments regarding Appendix U of the Specifications for Tank Cars, Manual of Standards and Recommended Practices. Appendix U is a generic maintenance and inspection plan for tank cars. It will include car manufacturers, owners, repair facilities and shippers. Although it is to be a recommendation and not regulatory, it shows the direction the industry is headed.

There is a large group of shippers and some owners that may not be aware of how this will affect them or what responsibilities the AAR, FRA and the industry will expect of them. If you do not subscribe to AAR circulars or attend Tank Car Committee Meetings you may not have ever heard of Appendix U or many other issues that will involve you directly. It is vital that the entire industry is on the same page in regard to Railcar safety and maintenance. If you would like to subscribe to, or learn more about, the AAR Circulars you may visit www.aar.org or e-mail us at info@transmatrix.com.
