THE ROBBER BARONS OF TODAY

You would like to think that the railroad skullduggery of the past is just that, in the past. So you would think. The problem is that history tends to repeat itself. Those old train robbers just couldn't quit after a \$60,000.00 robbery. Similarly, it seems that those who run the rails, still can't shake that robber baron mind set. Think about it. Can you think of any other company in the U.S. that states by rule, If we screw up, you foot the bill? And, they get away with it!

Currently all the major railroads and many regional roads have a tariff that states exactly that. Those of you who move tank cars are likely aware of Tariff RIC 6007-M, Item 187. This tariff covers mileage equalization for tank cars. Basically this compensates for the fact that the railroad cannot provide you a tank car. Years ago the railroadsdecided they did not want the liabilities that tank cars presented and decided to let the private sector deal with that problem. This tariff provides for movement in empty miles in the amount of 106 % of the loaded miles at no cost. The current cost for miles above 106 % is \$0.48 per mile. "No problem" you say. Car runs to the unload point, turns around and runs right b ack, Right? Not so fast. Got to read the fine print. Go ahead, read it yourself. Item 187 paragraph 4. "no adjustment to loaded or empty miles in the equalization account for mileage caused by error in handling of the reporting railroad or of another railroad,". Further on it states "or for mileage accumulated due to longer routes for railroad convenience". "Wait" you say. "If on the other hand, I don't use all of my 106 % shouldn't I get...". STOP right there. Don't you hear the maniacal laughter somewhere off in the distance?

If you are a tank car owner, you get this bill directly from the AAR in the middle of the following year. If you are a Lessee, the car owner will pass this on to you after they can look it over and process it. The only item you can get reversed is a clerical error. Any help you can give in reporting your car movements to the owner can help spot the clerical errors that at least you have a slight chance of getting corrected. By the way, there is also a time limit for addressing problems - about 3 years.

THE INSIDE TRACK
