### MEET THE GRANGERS

In 1867 a group of agriculturists headed by Oliver Hudson Kelley founded the National Grange of the Patrons of Husbandry. Originally intended as a fraternal organization, this group was the backbone of the Granger Movement. Though the Grange itself was not a political organization, their social gatherings allowed a rather dispersed agricultural community to commiserate and create an organized agenda. Under pressure from the Grangers and like minded groups the legislatures of many states enacted regulatory laws governing freight rates as well as elevators and warehouses. Many local communities felt the railroads discriminated by giving lower rates for long hauls rather than the shorter routes they required.

The states in which the most success was achieved were Illinois, Wisconsin, Minnesota and Iowa. In 1870 Illinois revised its constitution to allow for the regulation of the railroads. On April 7, 1871 a law was passed that limited freight rates, passenger fares and outlawed discrimination. Very shortly thereafter the Illinois Railroad and Warehouse Commission was created. The commission was empowered to enforce regulation. In 1873 the 1871 law was replaced with one making it the duty of the commission to prescribe "a schedule of reasonable maximum rates of charges for the transportation of passengers and freight". Moreover, if an Illinois company charged a rate higher than the commission deemed reasonable, it became incumbent upon the company to prove the reasonability of their rate. This was an important modification of common law that compelled the state to prove its case. Wisconsin, Minnesota, Iowa and other states soon adopted similar laws and commissions.

You don't think the railroads left it at that, do you? Find out next month...
