### THE STATE vs. RAILROAD REGULATION WARS

In the early 1870's several states established railroad commissions and laws regulating the railroads. Obviously the railroad companies wanted no part of such restrictions. They believed the states did not have the authority to fix the rates of a private business. They believed the states would be in violation of the "contract" enjoined when a state granted a railroad a charter empowering it to make reasonable charges for its services.

In 1877 the Supreme Court ruled in favor of the states giving them the right to fix intrastate rates and requiring the railroads to acknowledge the public nature of their services. In the absence of congressional regulation the courts also affirmed the states right to fix interstate rates.

In spite of the state victories, strong opposition from the railroads and the Panic of 1873 resulted in the repeal or modification of most state legislation and the weakening of their commissions to supervisory or advisory roles. The Illinois Railroad and Warehouse Commission was one of the few that retained mandatory powers. By the mid 1880's many states yet again realized the need for stronger regulation and again revised statutes. Some established mandatory commissions with rate making powers. In 1888 Iowa did so and other states followed suit.

For the decade following the 1877 court decisions, regardless of the give and take between the states and railroads, states did have the power to regulate interstate commerce. It was not until 1886 in the Wabash, St. Louis and Pacific Railway Company vs. Illinois case, did the court decide that states did not have right to regulate interstate commerce. This decision was a factor in motivating Congress to pass the Interstate Commerce Act in 1887.
