20	PD	5,000	Round Hatches, 15 PSI		11582
4	PD	5,750	Round Hatches, Food Grade Lining	Milled Grain	11703

## WHERE WOULD WE BE WITHOUT RAIL?

It may seem that we don't see much good in the Class I Railroads, but one thing that must be noted is that Railroads are as important to and for American history as the Wild West and the Industrial Revolution.

We all know how important Rail was for the growth United States. If not for rail rushing to connect the East to the West, all travel would have been via horse and wagon. While Rail may not seem nearly as heroic as some legendary endeavors like the Pony Express, it is Rail that built America. It also had much more staying power. The Pony Express lasted 18 months. Rail transports mail to this day and it is still building America.

During the massive growth of the Industrial Revolution, America depended on Rail. American Railroads carried 10 billion tons of freight per mile of track in 1860 and 79 billion tons per mile in 1879<sup>1</sup>. Between 1840 and 1860 the total length of railroad trackage increased from 3,326 miles to 30,600 miles<sup>2</sup>. By 1920, 254,000 miles of standard-gauge railroad track had been laid in the United States<sup>3</sup>.

These days we are all stuck in the quagmire of energy costs. There is no more efficient method of moving freight than Rail. We have all heard the adverts proclaiming the miles a ton of freight can be moved on a single gallon of fuel. By 2005 U.S. Rail was moving between 1.5 and 2 trillion ton-miles of freight<sup>4</sup>.
