OUR OLDEST RAILROAD

The U.S. has a long history of growth built on commercial rail that dates back 200 years. In the summer of 1809 Thomas Leiper, a quarry owner near Philadelphia, started construction of the Leiper Railroad. Mr. Leiper needed to move stone three quarters of a mile from his quarry in Swarthmore, PA to Ridley Creek, in Chester, PA. These "trains" consisted of single cars with iron flanged wheels drawn across wooden rails by horses.

It is not known exactly when the line opened but on September 27, 1809, Philadelphia's Aurora newspaper published an account of a demonstration Thomas had constructed in the yard of the Bull's Head Tavern in Philadelphia. He had set up a track, sixty feet long, with a grade of one and a half inches per yard. A ten thousand pound load in a four wheeled wagon was pulled up the incline by a single horse. In that same day's paper Thomas and his son George placed an ad looking for immediate labor to dig the railway as well as to make and lay track. The original Leiper Railway lasted nearly two decades before George replaced it in 1828 with a canal. By 1852 though, the relative merits of railways overcame the canals and a second Leiper Railway was constructed. This one extended all the way to the Delaware River, a distance of 2.6 miles, to enable larger vessels be loading directly from railcars. Both Leiper lines were always horse drawn. When the B&O bought it out and made it their Crum Creek Branch, the horses were replaced by steam locomotives. The portion of the Crum Creek Branch to Leiper Quarry was abandoned in 1942 and in 1943 the track was removed to provide steel for the war effort.
