CORNELIUS VANDERBILT, RAILROAD TYCOON

On January 4, 1877 Cornelius Vanderbilt, age 82, died in New York. At the time of his death his wealth was estimated at \$100 million. This total, if applied to modern value would likely make him the second or third wealthiest man in U.S. history. Vanderbilt University was named in his honor after his endowment of one million dollars. At that time it was the largest charitable donation in American history.

At age 16 Vanderbilt entered the business world operating a ferry for freight and passengers between Staten Island and Manhattan. He soon purchased a schooner to trade in food and merchandise. In 1817 another ferry operator had him captaining a steamboat between New Jersey and New York. Within the next two decades he would take over or compete with a vast network of steamboat and ferry lines in the New York area. In the 1830's many steamboat operators were referred to as "commodore". By the 1840's, only Vanderbilt retained this nickname.

Early in the 1840's Vanderbilt began taking over management of the rail lines connecting to his steamboat lines. He took over the presidency of the New York, Providence and Boston Railroad in 1847. Vanderbilt served on the board of directors for five railroads during the 1850's. Then, in 1863 he bought control of the New York and Harlem Railroad (commonly known as the Harlem) in a famous stock market corner. Through the Harlem, Vanderbilt constructed the Grand Central Depot on 42nd Street in Manhattan. The depot would be replaced by the Grand Central Terminal in 1913. All told, Vanderbilt controlled thirteen railroads in his lifetime.
