ANDREW CARNEGIE, MAN OF STEEL

"To spend the first third of one's life getting all the education one can. To spend the next third making all the money one can. To spend the last third giving it all away for worthwhile causes."

Andrew Carnegie did all of these things with great success. Though Carnegie did not advance his formal education past the elementary level, he never stopped learning. His family's great respect for books and learning was carried throughout his life. Education was, in many ways, amongst his greatest achievements. Not a deeply religious man, Carnegie wanted to be viewed by the world as a 'positivist'. Once Carnegie decided a course of action, little would stop him from achieving his goal. Several quotes attributed to him reveal this line of thought. "Concentrate your energies, your thoughts and your capital. The wise man puts all his eggs in one basket and watches the basket." as well as "The men who have succeeded are men who have chosen one line and stuck to it."

Andrew Carnegie started his work life, at the ripe age of 13, as a bobbin boy, changing spools in a cotton mill, six days a week at the princely sum of \$1.20 per week. Within a couple of years he became a messenger for the Ohio Telegraph Company earning \$2.50 per week and free admission to the local theater. A quick study, Carnegie soon learned to directly translate telegraph signals by ear, never needing to write the code. Building on this experience, at the age of 18, he started as a telegraph operator for the Pennsylvania Railroad Company under the supervision of Thomas A Scott. Carnegie soon advanced to the position of superintendent of the Pittsburgh Division. In the spring of 1861, the early days of the Civil War, Thomas Scott, now the Assistant Secretary of War appointed Carnegie to the post of Superintendent of the Military Railways and the Union Government's telegraph lines in the East.

After the war, Carnegie decided to direct his energies into ironworks. Using his ties to the Thomas Scott and J. Edgar Thomson, President of the Pennsylvania Railroad, Carnegie secured contracts for his newly formed Keystone Bridge Works and for rail from his Union Iron Works of Pittsburgh. To keep the Pennsylvania Railroad a his best customer, Carnegie gave shares of his companies to Scott and Thomson.
