44	LO	5,250	100 Ton Trucks, Gravity Gates	Wooden Pellets	12205
<b>25-35</b>	<b>PD</b>	<b>2,700-3,200</b>	<b>Round Hatches, 15 PSI</b>		<b>12240</b>
1-3	PD	3,200+	Round Hatches, 15 PSI		12062

### GRAND CENTRAL

There are very few of us that can correctly say they have been to Grand Central Station. That building disappeared slowly but surely over a span of a decade just about a hundred years ago. Though still popularly referred to as a station, what is now Grand Central Terminal is a testament to the growth of rail in that time.

The three rail lines that served that area of New York were originally stationed in side by side facilities. Conceived by Cornelius Vanderbilt, the Grand Central Depot opened in October of 1871 at a cost of \$6.4 million. It combined the New York Central & Harlem, the New York & New Haven, and the New York Central & Hudson River Railroads into one larger station. Though considered outdated from the outset, the Depot served New York well for nearly thirty years.

Passenger stations typically included a head house and a train shed. The head house contains offices, ticketing, passenger waiting rooms and baggage, whereas the train shed accommodated the tracks and platforms within a generally open area covered with a roof. In 1898 the Depot's three story head house was replaced with a six story building. The train shed was enormous. Made of glass and steel it encompassed an area 100 feet wide by 650 feet long. The yard was reconfigured and the facility was renamed Grand Central Station.

Unbelievably, by 1902 the station no longer suited the needs of electric trains and plans for a new station were already in the works. A prestigious group of architects submitted designs for the new station, including such notables as the designers of New York's Pennsylvania Station, McKim, Mead & White and Daniel Burnham of Chicago's 1893 Columbian Exposition. The winners, however were a combination of two groups of architects, one from St. Paul, Stem & Reed and one from New York, Warren & Wetmore. On February 2, 1913, after ten years of construction, Grand Central Terminal opened and went on to become the busiest train station in the country.
