## THE ILLINOIS CENTRAL

Once known as the Main Line of Mid-America, the Illinois Central was the first rail line in America to receive a land grant for rail construction. In 1850 President Millard Fillmore enacted the Federal Land Grant Act with the intention of promoting a rail line from the Great Lakes to the Gulf of Mexico. In return for the land any rail lines built had to move government property at a reduced rate. The Illinois Central was happy to oblige.

Illinois Senator Stephen Douglas and future President Abraham Lincoln lobbied the Illinois General Assembly for a railroad charter for the IC. They accomplished this on February 10, 1851. Both men had strong reasons to get this accomplished. Senator Douglas owned land near the terminal in Chicago and Mr. Lincoln was, at the time, a lawyer for the IC.

The IC was completed in 1856 and stretched from the lead mines of Galena, IL to Cairo at its southern tip. A branch line ran from Centralia to the city of Chicago. Upon completion it was the longest rail line in the world. The line would extend into Iowa in 1867. The IC continued to expand into the 1870s and 1880s reaching New Orleans, Louisiana in the south, Dodgeville, Wisconsin to the north, Louisville, Kentucky in the east and Sioux Falls, South Dakota in the west.

In August of 1972 the Illinois Central merged with the Gulf, Mobile and Ohio Railroad to form the Illinois Central Gulf Railroad. In the 1980s the ICG divested itself of many of its east west lines as well as unnecessary north south lines. This created some new rail lines such as the Paducah and Louisville Railway and the Chicago Central and Pacific Railroad. In 1998 the rail line was purchased by the Canadian National and continues as such today.
