LINCOLN'S LAST RIDE

On April 21 1865 The locomotive Nashville and a group of eight coach cars, including the United States Military Railroad palace car bearing the body of Abraham Lincoln, departed Washington, DC's B&O Railroad depot. The President's family were carried in a Philadelphia, Wilmington & Baltimore Railroad Company car, normally reserved for the use of the Railroad's President and Directors. Thousands of soldiers, presenting arms, lined it's passage.

Lincoln's funeral train was to traverse nearly 1,700 miles and millions of mourners. In Philadelphia, a half a million people were in the streets. Throngs of mourners would show up during early AM hours to view the passing train in numbers far exceeding the populations of the small rural towns through which the procession passed on it's way to Springfield, Illinois.

Every year for a century after Lincoln's initial last ride a phantom train is allegedly seen traveling the same route. At the stroke of midnight a ghostly light is seen to pierce the darkness. A black carpet of fog precedes the train and the rails glow with an eerie green light. Without a sound the locomotive dressed in crepe and black cloth rolls up the track. A line of phantom soldiers at full attention and decked in Union blue flicker in and out of sight. The funeral car, bearing the coffin of the great man looms into view. Just barely discernible, a thin dirge of music wells up within your head as an orchestra of skeletal figures wield darkly lit instruments. Within a moment and just as quickly as it appeared, the procession rolls out of sight. Slowly you observe the light of the full moon returning and you sigh in relief as you realize you've been holding your breath.
