50	PD	3,000+	14.7 PSI	Cement	12445

RAILCAR ONE

When we think of presidential transportation, Air Force One is first to come to mind. Air travel, however was not always chosen as the preferred transit method. The private luxury observation car Ferdinand Magellan was built in 1927 by the Pullman Company along with five other such cars named after famous explorers.

In 1942 during World War II it was decided that then President Franklin D Roosevelt should travel in something other than a standard railcar. The Ferdinand Magellan was chosen to be modified for Roosevelt's use. The walls, top and bottom of the car were fitted with 5/8 inch armor plate. The windows were replaced with 3 inch thick bullet resistant glass. It included bank vault type doors at the rear of the car and escape hatches below the lounge and presidential bathroom. Six bedrooms were reduced to four. The car also included a dining room, an observation lounge, a pantry, a galley, a mechanical room as well as storage and an ice bunker. These changes increased the weight of the car from 160,000 lbs. to 285,000 lbs., the heaviest passenger car ever used in the United States.

President Roosevelt used US Car No. 1, as it became known, for two years, racking up over 50,000 miles. The open observation platform at the end of the car served as Roosevelt's stage for many of his "whistlestop" campaign speeches. Roosevelt last used the car on his trip to Warm Springs, GA just before he died there.

Presidents Truman and Reagan also used this car during their re-election campaigns. The Ferdinand Magellan was listed as a National Historic Landmark in 1985 by the National Park Service and can now be found in Miami, Florida's Gold Coast Railroad Museum.
