HAUNTED STATION

Leamington Spa Station in county Warwickshire England was originally built in the late 1800's. It was refurbished in 2008 to restore the Art Deco style of the original builders, the Great Western Railway.

This station is so haunted that the current operators, the Chiltern Railway has hired a supernatural liaison officer. Officer Nick Rees rides with the passengers and acts as a liaison between the railway and all the passengers, including those less substantially composed. His duties are said to include checking ghosts' tickets, ensuring that they do not eat customers' sandwiches, directing them to their train and generally keeping these spooky specters in check. There are signs posted directing ghosts to purchase tickets and prohibiting them from merely "passing through" the gates.

One of the station's more haunted locations is a basement platform with a partially blocked stairwell that seeming leads no where. Staff in the upstairs offices report electrical equipment turning on and off. Drawers are found open with paperwork strewn about. Footsteps are heard when no one else is around. They appreciate the reprieve when meetings abruptly end when doors slam for unknown reasons.

Stephen Herbert, is a night time security officer at the station. He states "I often see and hear ghosts on both platforms but from what I have seen they are nice ghosts and have good energy."
