## PACIFIC RAILROAD ACT OF 1862

On the First of July, 1862, President Abraham Lincoln signed into law the Pacific Railroad Act of 1862. It was intended to foster the creation of a transcontinental railroad system for the U.S. This act authorized land grants and the issuance of 30 year government bonds.

The act granted right of way to allow a continuous railroad and telegraph between Council Bluff, IA and Sacramento, CA. The land grants included 200 feet to either side of the railway. It granted all earth, stone and timber within the right of way to be used for the construction of the railway as well as grounds required for stations and buildings. It also granted an additional 6,400 acres of land for every mile of railroad. Though the mineral rights for this additional land was not granted, the timber rights were. The railroads initially involved were the Union Pacific, the Central Pacific and the Leavenworth, Pawnee and Western Railroad Company of Kansas

Each of the government bonds were of one thousand dollars, included a rate of 6% and payable in 30 years. There were to be 16 such bonds issued per mile in each section of forty miles of railway. For those particularly mountainous areas the amount of bonds per mile was doubled or even tripled. To ensure repayment of the bonds the issuance of which, ipso facto created a first mortgage of the entire railroad including rolling stock and property of every kind. The rail companies were also allowed to issue their own bonds not to exceed those issued by the U.S Government.

From 1850 through 1851, the railroads acquired 175 million acres of land, roughly equal to one tenth of the entire United States and larger than the state of Texas.
