## THE EARLY GROWTH OF KANSAS AND THE GREAT PLAINS

Back in the 1860s the U.S Government was all in on expanding westward. Not only was the government granting land and issuing bonds through the Pacific Railway Act to the benefit of the railroads, the Homestead Act was enacted several months earlier to encourage individuals or families to move west as well. After decades of being squeezed out by large land owners and plantations in the south, small farmers and families were eager to work the unforested lands of Kansas that seemed easier to develop. The Homestead act granted 160 acres of land, west of the Mississippi, to anyone who had not borne arms against the U.S. Government. The land grant required they live there for 5 years, build a home and grow crops. Even those from other countries were eligible as long as they agreed to become citizens.

The Pacific Railway Act granted extra allotments of land to the railroads to allow them to generate additional funds to build the railways. One of the ways in which this extra land could generate funding was that it could be sold. Additionally if it was sold to those who would grow crops or produce goods, those items would need to be transported. This would allow the railroad to work toward securing its future revenue as well. However, why would anyone buy land from the railroad when the government was giving it away? As generous as the Homestead Act may seem, the difficulties involved with improving a large amount of land in isolated areas, often without water for irrigation and minimal resources were regularly insurmountable. Additionally, conflict with Native Americans was common at the time. As many as 60% of the homesteaders abandoned their land before fulfilling their obligations. Not only were the railroad lands already in proximity of the rail lines, the railroad offered reduced or free transportation to potential buyers as well as free cartage of all their belongings to their newly purchased land.

Originally intended as a secondary and southern line of the transcontinental railroad, the Leavenworth, Pawnee and Western Railroad Company of Kansas would become the Kansas Pacific Railway in 1869. In 1874 Jay Gould gained control of the line and would later consolidate it into the Union Pacific.
