## MANAGING RAIL AND COVID-19

We already know that Rail is essential. Keeping our businesses running smoothly and efficiently has been a priority since day one. For most, the day is long and there is always more on your plate to be done at the end of the day. Juggling all the parts and pieces to keep it running can be a marvel of organization or maybe just simple determination. Perhaps now though, the 'essential' part of rail has become more prominent. The importance of keeping some form of normalcy for society as a whole cannot be understated.

Right now, rail, like trucking, is the life blood of society. Keeping the flow of supplies and energy needed for us all to keep moving is vital. Fortunately, for many of us, there is no drop in activity and we are as busy as ever. The ability to work a 'normal' day can be a balm, an escape from the news of the world. For others, the work day cannot end soon enough as we seem to have accumulated so much more to worry about in our every day family lives.

Of all the good things that can be said of rail, our ability to work together can top the list. You probably don't really notice a big difference now though, because it has always been there and today's occurrences are not going to change anything. Should we be able to help, should you need something, we are here, do not hesitate to reach out. Maybe you feel you have heard it to many times lately, but we think you already know this too; We are all in this together. This is why we are confident that You, that I, that We, will find our way through it all.
