**FREIGHT CHARGES FOR TANK CARS
MOVING INTO OR OUT OF SHOPS**

We are guessing you are all aware that railroads have implemented a change in the way they deal with tank cars entering and leaving repair facilities. You should take the words "deal with" to mean "charge for".

As of March 1, 2015, BNSF had charged \$2.50 per mile and 13¢ per mile as an added fuel charge. This charge is for any tank car moving to or from a repair facility unless it is immediately proceeded by a loaded line haul revenue move via the BNSF. However since that time the rate has jumped up to approximately \$4.00 per mile depending on distance and does not drop below \$3.45 per mile until your move is over 2,100 miles.

This means that if a car moves from an unload point on another carrier to a shop on the BNSF, there will be a charge both to and from the shop at that rate per mile. The BNSF defines a repair facility as one that performs cleaning, lining, relining, maintenance, modification, retrofit or repair.

The BNSF is not alone in this as you may already know that the CN, CP, UP, & KCS also have similar charges. Some regional and short lines do this as well.
